**PMS Colors Note:** Please note that the chosen PMS colors are spot colors using the Pantone Matching System based on your approved, CMYK printed presentation boards, and by design, cannot be achieved when printing CMYK. So for materials that are not printed with Pantone ink, the colors will differ (in some cases, significantly).

**Paint Colors:** These are the closest approximations to the colors in your color palette and environmental mockups from your printed presentation boards. Please note that sunlight, environmental lighting, texture and base wall color can affect these in different ways. We strongly suggest painting small samples in specific lighting and on specific walls viewed at different times of the day with these suggested colors before purchasing large quantities of paint or beginning the final application. Please work with your chosen paint vendor to ensure that the final colors are matched against the presentation board as best as possible if needing to make any further adjustments, understanding that the provided colors are suggestions based on normal conditions.
